WATERSHED MANAGEMENT EXHIBIT

Public Works, as a leader in the planning and implementation of watershed management in the County of Los Angeles, will begin promoting public awareness of watershed management through creative and informative exhibits in County facilities, including offices, libraries, and parks. Our goal is to inform and educate County employees and the public on all aspects of watershed management.

The exhibits will present watershed management information on topics, such as stormwater quality, endangered species, water conservation, flood protection, habitat preservation and recreation. We will also provide descriptions of the County's watersheds and information on current projects. The first exhibit "Watershed Management in Public Works," will be held at the Kenneth Hahn Hall of Administration and will be located next to the courtyard entrance on the second floor, beginning December 2, 2002. The exhibits will be displayed for one week, with a new topic introduced every month.
